

# Building Professional Higher Education Capacity

buildphe.eu

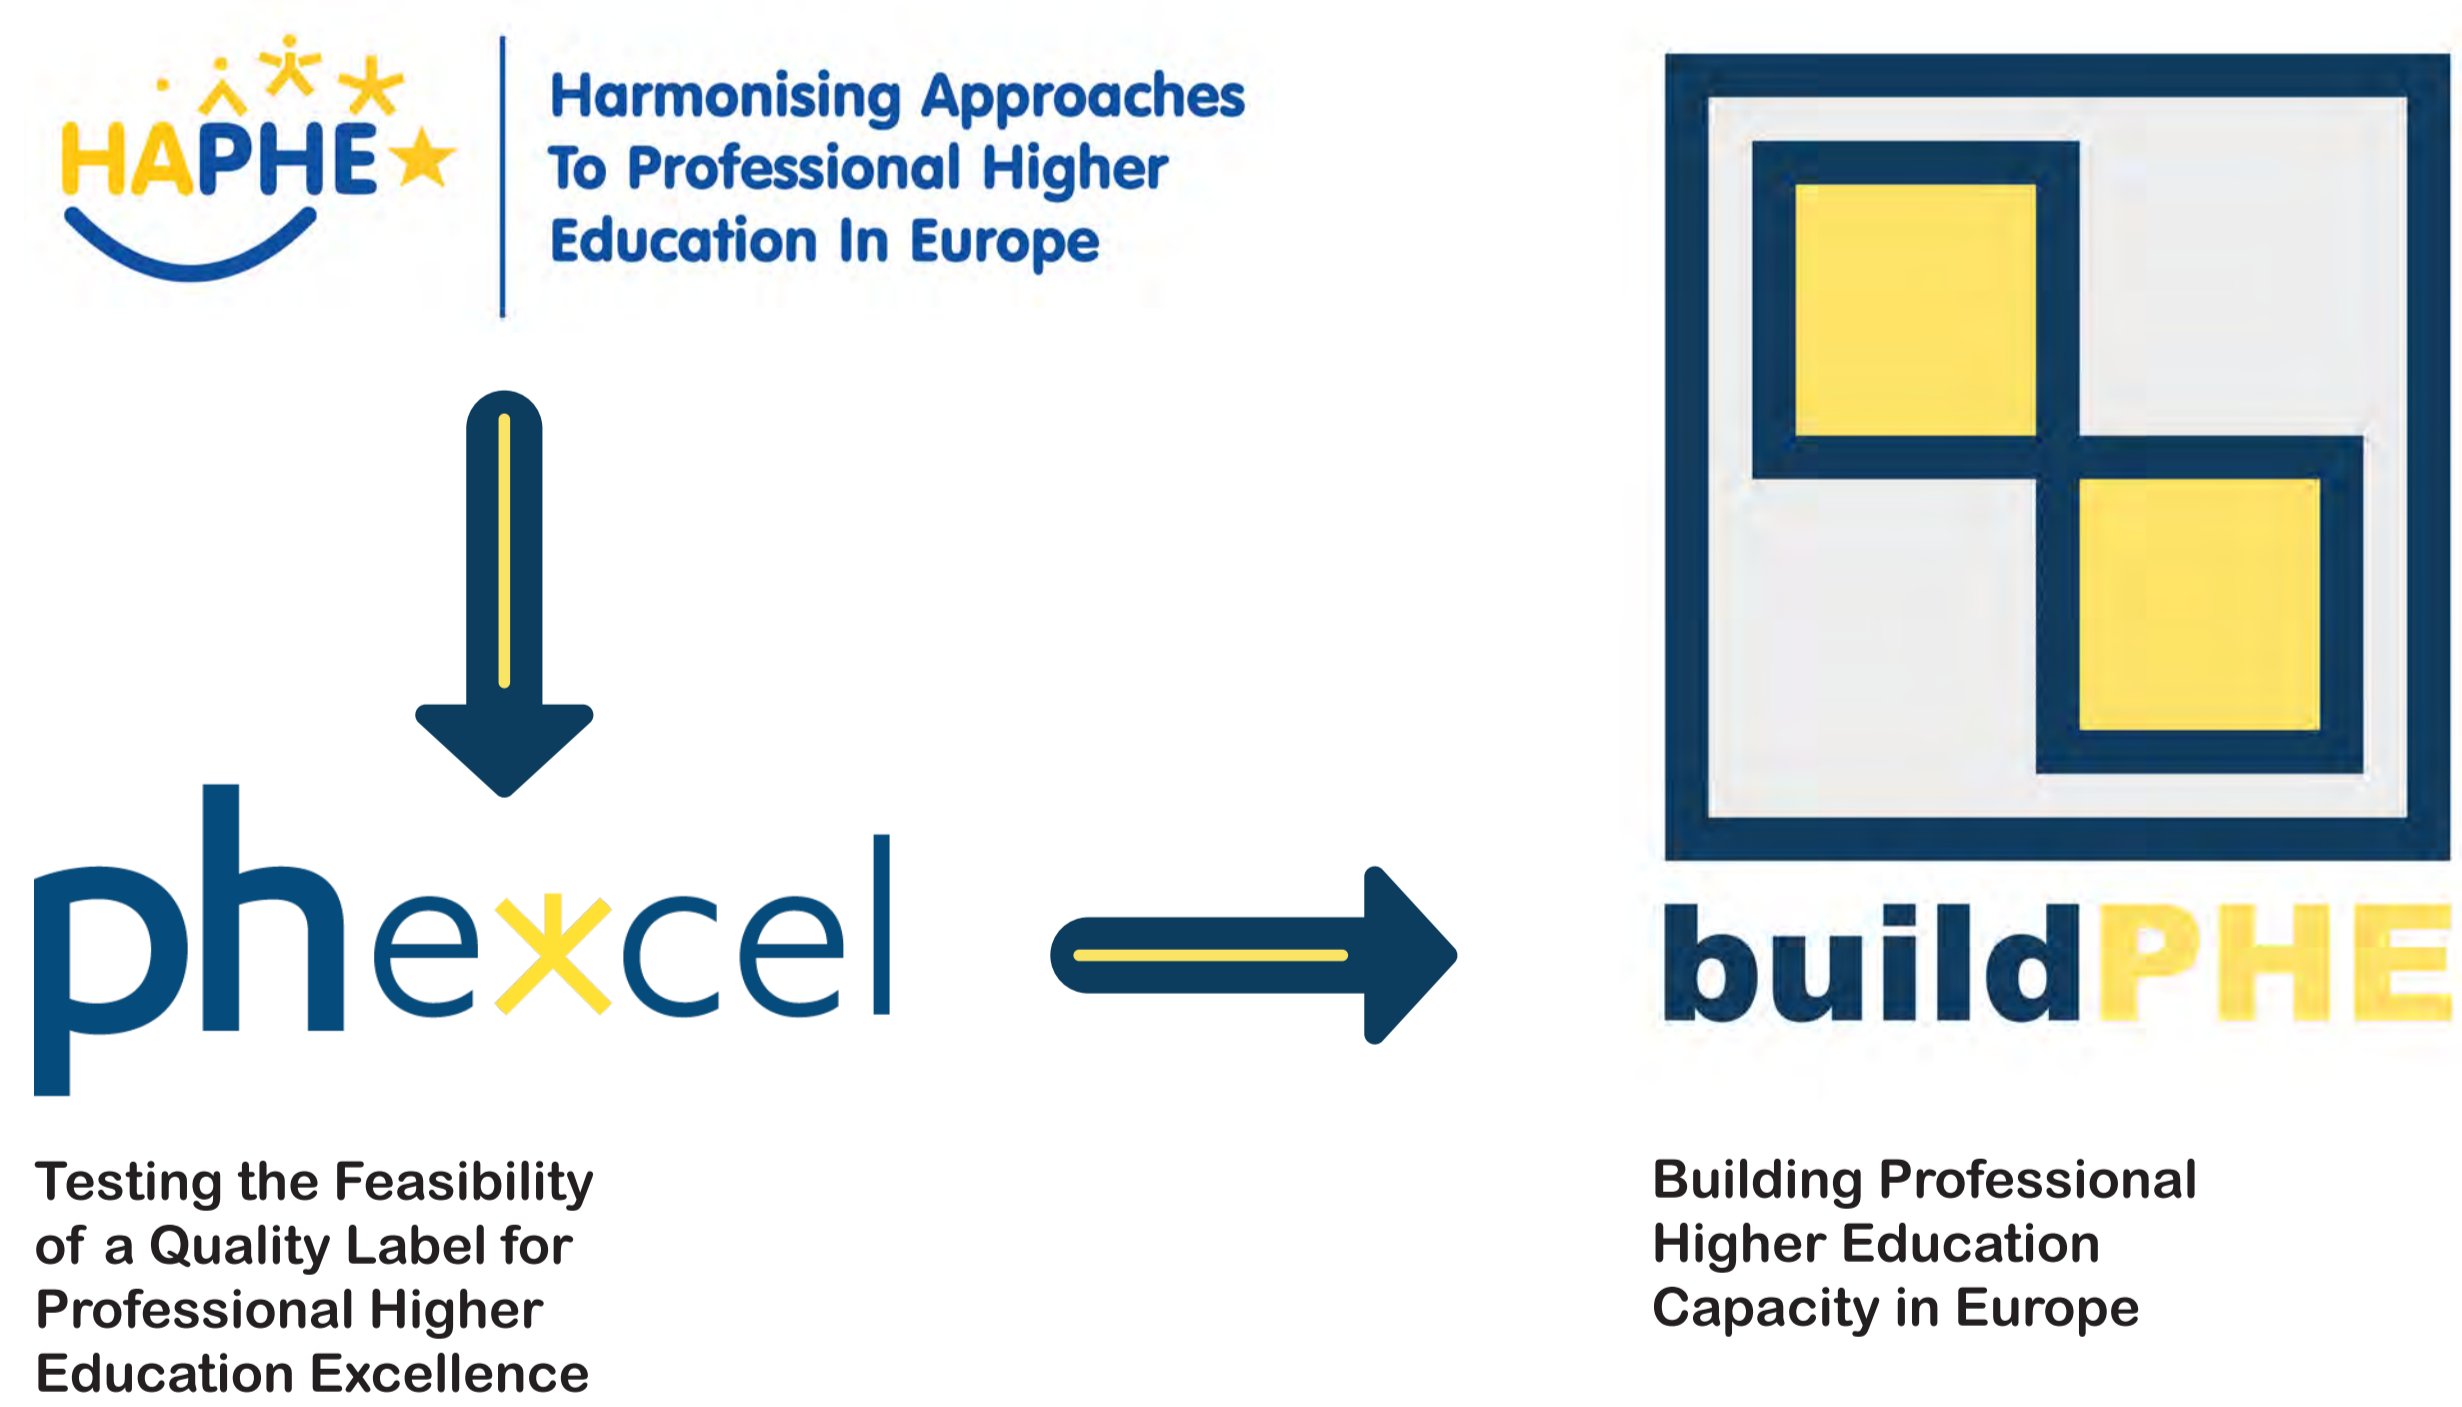

BuildPHE's main aim is to foster improved collaboration between PHEIs and enterprises, by increasing the quality of the 'professional' experiences on offer in the same institutions. This will increase the choice of learning pathways available to students, in particular strengthening 'dual' options involving a mixture of studies and work experience such as apprenticeships.

## Institutional Self-Assessment Tool

The self-assessment tool allows institutions to quantify the extent of their relationship with the world of work.

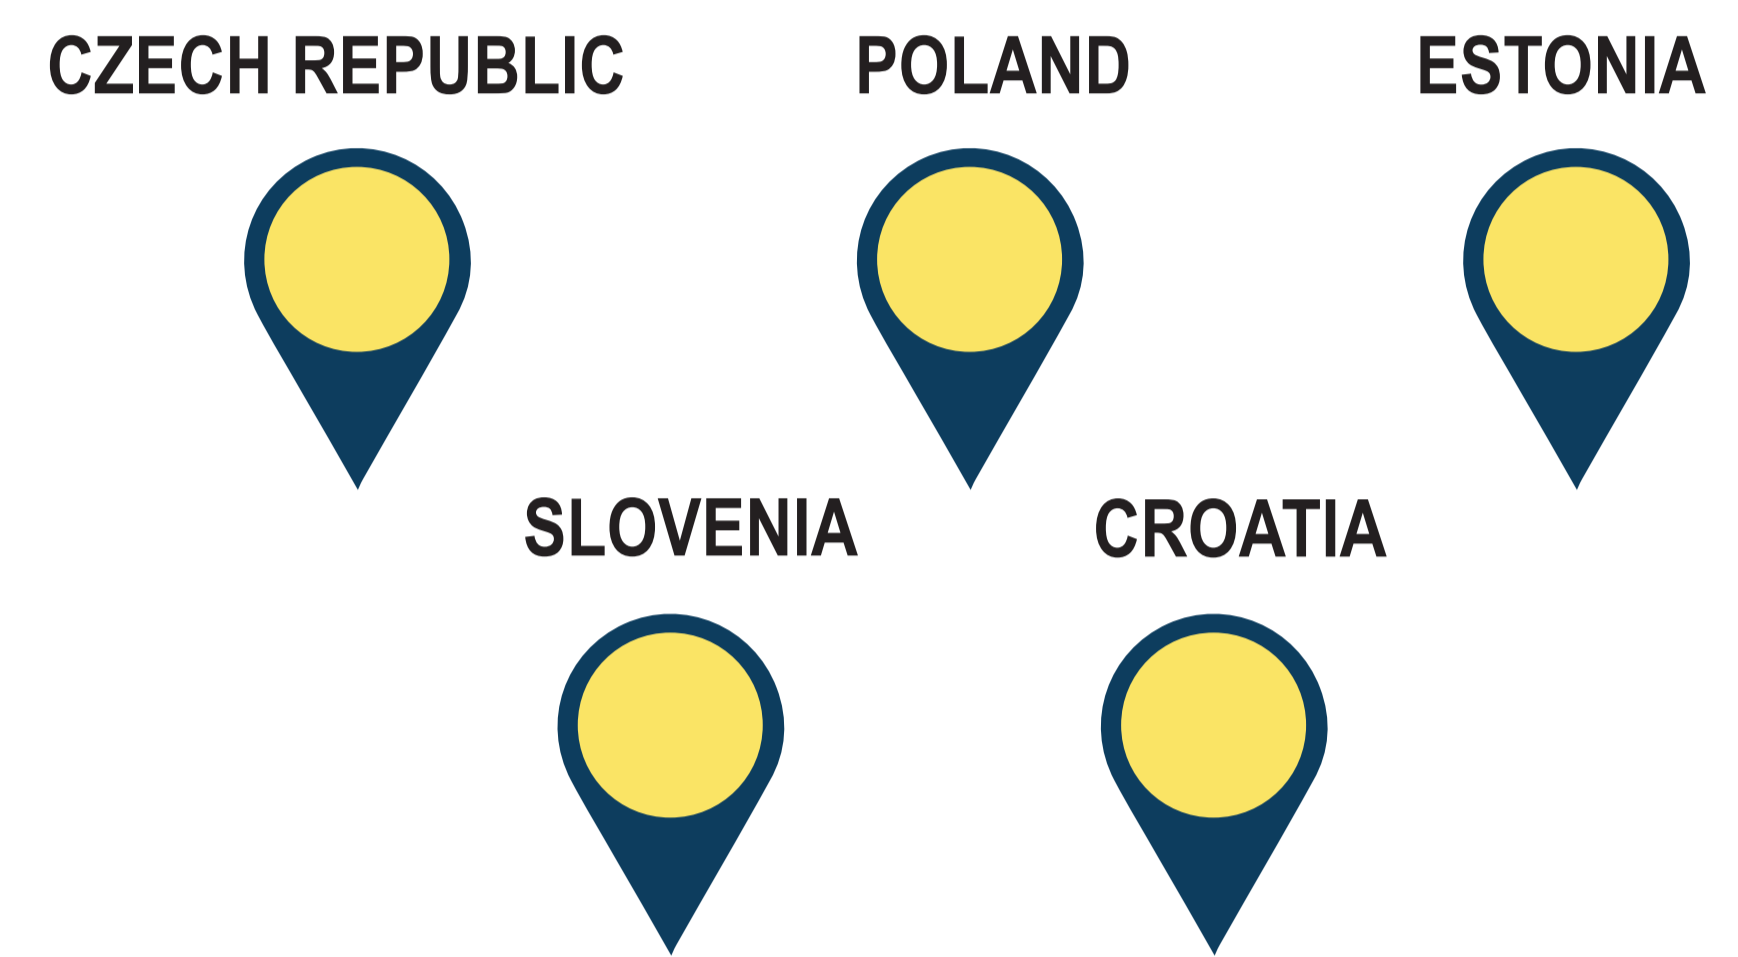

## Lineage of the Project

## Reforms to Policies and Practices

15 Higher Education Institutions around Europe are performing self-assessments against the framework, and produce improvement plans to improve employability of their graduates, and their overall connection with the world of work.

### CZECH REPUBLIC:

- Medical College of Nursing
- CARITAS – College of Social Work in Olomouc
- Institute of Technology and Business in České Budějovice

### POLAND:

- Andrzej Frycz Modrzewski Krakow University
- State University of Applied Sciences in Elbag
- State Higher Vocational School at Tarnow

### ESTONIA:

- Estonian Academy of Security Sciences
- Tallinn Healthcare College
- TTK University of Applied Sciences

### SLOVENIA:

- Higher Vocational College Slovenj Gradec
- Higher Vocational College for Hospitality and Tourism Bled
- Alma Mater Europaea – ECM

### CROATIA:

- University of Applied Sciences „Hrvatsko Zagorje“
- University College of Management and Design Aspira
- University College for Management in Tourism and Informatics

Furthermore, we will develop a set of framework policies connecting curricula, research activities and/or strategy with the World of Work. The model policy-frameworks will be set out in such a way as to allow institutions to formulate policy-text based on a standardised set of questions/statements. This will allow institutions to incorporate their best-practice in the field into their self-assessment and improvement cycles. The improvement of strategies based on the framework will be supported by a usage-handbook. The project will also make recommendations to national policy-makers as to measures to improve and enhance cooperation between academia and enterprises.

## Collection of Best Practices

We are currently putting together a database of specific interventions implemented by institutions to improve their connection with the world of work, and highlight ways to replicate them.
