

Evaluation Report

The Evaluation of the 23rd EURASHE Annual Conference in Split (Croatia) was done on the basis of the **24 presented evaluation forms**, which is one sixth of all the attendants participating in the Conference. Submitted reports represent mostly the views of **higher education institutions**, having half of the forms submitted by higher education colleges and Universities of Applied Sciences. Other submitted forms were by representatives of Associations of HEIs and Governmental Agencies/Institutions.

The content of the Conference is viewed very positively reaching **90% of good/excellent** evaluations. The 3 different tracks were evaluated well, with the Track I: Education as the most successful one, being followed by the Track II: Innovation. **Speakers** at the Conference have been **well evaluated**, with the presentation of Prof. Ziegele and Dr Paronen being especially appreciated.

General experience during the Conference gave **very good overall results**. The most acknowledged were the information provided prior to the conference, as well as the overall organisation and the logistics. Participants have as well appreciated the social programme and the gala dinner. As an improvement from the previous events, the networking opportunities have been increased, same as interaction during the sessions.

For further improvements, it has been suggested to consider a new way of **bringing together the results of working sessions** to the final plenary session. It is important to further innovate in the presentation of the content.

Most of the participants learnt about the Conference through **EURASHE's website or newsletters**. A large number of participants have stated that they were informed about the conference through other colleagues or previous EURASHE events, showing a good reputation of EURASHE in the field of higher education.

The overall satisfaction with the Conference was evaluated with 12 excellent and 12 good grades.
