

The Network for the Promotion of Language Strategies for Competitiveness and Employability

CELAN is the result of a long development of language policies at EU level. Its direct origin is the Business Platform for Multilingualism, an initiative of DG Education and Culture of the European Commission. The project's principal objective is to facilitate a dialogue in the language field between the business community and language practitioners.

The project activities include:

- Research on linguistic needs of European companies/SMEs in different sectors
- Analysis of existing language-related services and tools
- Development of on-line applications to support the language needs of business users

Visit the CELAN website and news blog at:
