

EURASHE Networking event on Modernisation of higher education

Time:

June 16, 2017

Location:

Erasmushogeschool Brussel, Zespenningenstraat 70, Brussels ([map](#))

The EURASHE Networking event on Modernisation of higher education will provide an overview of trends and developments in European higher education, with a focus on developments within the professionally-oriented segment. This should create a basis for further discussion on challenges, further priorities and initiatives. The event is planned as another step within EURASHE's review of strategic priorities and identification of key issues for the policies. Therefore, besides the overview of a recently reviewed higher education modernisation agenda by the European Commission, attention will be given to a number of cases covering key developments within European countries or experience from the [PROCSEE](#) project (policy development for professional higher education in Central and Southeastern Europe).

Programme

14:00 – 16:00 Networking event on modernisation of higher education
