

## INFORMATION

About the "Legal Tech" laboratory of the Center of Legal Initiatives and Innovations of the Tashkent State University of Law

The "Legal Tech" laboratory at the Center of Legal Initiatives and Innovations was organized in accordance with point 33 of the Roadmap for further improving the activities of TSUL by PD No.UP-5987 dated April 29, 2020 "On additional measures to radically improve legal education and science in the Republic of Uzbekistan".

This laboratory serves as a center for business incubation and acceleration of start-up projects at the university. The laboratory constantly monitors the development and achievements in the field of information technology, including technical solutions that can be used in the development of information and legal technologies and systems; ensuring the development of information and legal technologies. The purpose of this laboratory is to awaken students' interest in information technology and systems and to attract them to this area.

To introduce and commercialize new developments in 2021, the following 7 start-up (pilot) projects were created:

- The "**Legal City**" platform and its mobile application were created (domains HuquqiyShahar.uz, LegalCity.Uz and LegalCity.Uz).
- The site "**Adlex.Uz**" was created to create a unified register of legal services in the country.

The platform ranks law firms, notaries and legal advice providers and updates it every six months. At the same time, on this platform, citizens will be able to obtain information about government agencies and departments, including the address of each government agency, working days and receptions, and contact information.

The platform also provides fee-based services, with citizens being the first to find information about fee-based law firms when they search for a law firm on the platform.

- The **alimont.uz** platform has been created, which has an application for collecting alimony and alimony calculator. This will create a completed application for plaintiffs and download it to a computer for filing with the court.

- In order to increase the international rating of the University "SDG-TSUL.Uz", a portal was created on 17 indicators of the Sustainable Development Goals (Sustainable Development Goals).

- An online library **library.tsul.uz** University has been created. Through this system, you can read legal literature in electronic form.

- The “**s-library**” project (domain s-library.uz) was launched, providing legal translation and additional paid services of the information resource center.

As part of the project, a scientific translation website was created and a team of student translators was formed. As a commercial mechanism, it is possible to pay for services through Payme.

- The portal "**b4u.uz**" (Business for You) was created. It provides businesses and the public with information about business news, benefits, and legislation.

Currently, work is underway to effectively implement start-up projects. To attract students to this activity and form project groups in accordance with the portfolio of startups, announcements were posted on the official website of TSUL and on social networks. As a result, a resident base of the laboratory was formed, consisting of more than 40 students.
