

QA at a crossroads

EURASHE Quality Assurance Community of Practice

QA in professional higher education is at a crossroads, influenced by the ESG revision, the European Degree Label, and the growth of flexible learning pathways. In this session, the EURASHE QA Community of Practice opens the floor to the urgent issues its members are wrestling with.

Co-leaders will share insights from the network, and participants are encouraged to share their own experiences. Expect an interactive, discussion-based session designed to set the CoP's priorities for the coming year.
